

RBmAPL-2nD
MikroTik mAP lite 802.11n Access Point

Frequency Category

2.4GHz

Wireless Technology

802.11b , 802.11g , 802.11n

Ethernet Speed

100Mbps

Integrated PoE

PoE (non standard)

Stock Level: **Product in stock**

\$54.00 + GST

Description

The MikroTik mAP lite is our smallest 2.4GHz wireless access point. It is barely larger than a matchbox, we even had to use a special Ethernet port to match it's slim profile. You can carry it anywhere: use as a travel router to extend that hotel internet to all your devices, or as a client device to improve your laptop signal range, the tiny mAP lite will be always with you. It comes with a built-in magnet, so you can attach it to any ferrous surface, or if those are not available, a metallic plate with an adhesive back is also included. It can also serve as a simple configuration tool for your servers, if there is no ethernet on your mobile device, plus, it neatly attaches to the rack with it's magnet. The mAP lite is a dual chain 802.11 b/g/n device and operates in 2GHz.

Specifications

Details

Product code	RBmAPL-2nD
CPU nominal frequency	650MHz
CPU core count	1
Size of RAM	64MB
10/100 Ethernet ports	1
Wireless standards	802.11b/g/n
PoE In	Yes, 5-60V
Dimensions	48x49x11mm
Operating System	RouterOS
License level	-30 + 70 C
Antenna gain DBI	1.5dBi
Max Power consumption	3.5W
Number of chains	2
