

Battery POE Wi-Fi

Portable device for alignment and testing of POE internet antennas, Ubiquiti, MikroTik, Cambium, ecc.

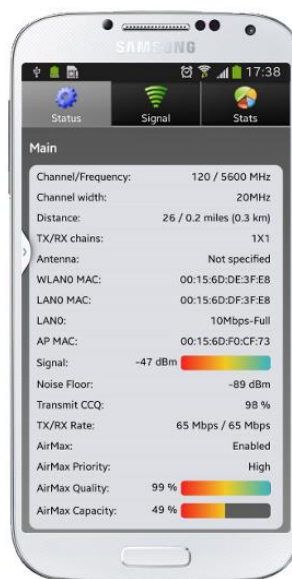

Function:

- **Passive Power Over Ethernet Device, Ubiquiti, Mikrotik, ecc.**
- **24V PoE 8W 6000mAh / 15W 7000mAh**
- **Battery Router HotSpot WiFi - 15 hours of battery life without poe**
- **PowerBank cell charger or other application**
- **15 Hours Wi-Fi**
- **6 Hours autonomy with 4W load (PowerBeam)**
- **Short-circuit protection, on USB and POE**
- **Protection at accidental connection to 48V POE**
- **Charge indicator - 4 led**
- **Perfect match with the App EasyUBNT**
- **OpenWrt Inside, Web Server**

- 3 switch state:
USB Out (Charge/LED)
USB + WIFI
USB + WIFI + POE
- *PoE on Switch*

Accessory:

- ***USB Ligth***
- ***Hard Case***
- ***Soft Case***
- ***USB Cable***
- ***Lan Cable***
- ***Cambium cable (on 15W model)***

UPS POE with SMS (GSM)

12V 35W thermally compensated battery charger for acid lead batteries.

The thermal compensation allows to respect the batteries in an extended temperature range as the external one.

12V input elevator, adjustable 24V to 48V output with built-in Voltmeter.

The voltmeter allows to read the battery voltage or the output voltage.

Management via SMS GSM

An SMS alerts you when the current is missing or returns.

With an SMS you can switch off, switch on or restart the antennas.

Switching diode circuit.

POE injector.

Different voltages and powers on request.

Multiple outputs.

Various customizations.

GEVA elettronica.
